# 360° inspection and quality control

**Integrated management system**  
for centralized quality control

**Dedicated ejectors**  
with independent management  
of the various product categories

## PRISMA SERVICE

**PRISMA INDUSTRIALE S.r.l. is not simply a machinery supplier:  
it is your partner in product inspection and quality control.**

A partner who is by your side from the start to help you identify the right instrument and is there even after the sale, offering all the services necessary to reach your goals and maintain them over time.

### TRAINING

Our Training Centre has put together a training programme that will allow you to use the potential of the machines to the fullest, guaranteeing proper operation and lengthening the life cycle.

### CERTIFICATIONS, VALIDATIONS AND MAINTENANCE PLANS

PRISMA is always by your side to make you up to date with evolving standards and to check proper machine operation with periodic calibration checks.

### REMOTE AND ON-SITE ASSISTANCE

Our team of experts and maintenance technicians is at your complete disposal to provide information about our services, resolve a problem over the phone or schedule a service call at the establishment.

### SPARE PARTS AND SAMPLES

Often, even the failure of a small machine component can cause production standstills and serious losses for a business. That's why we have an office exclusively dedicated to quickly supplying original spare parts.

## PRISMA INDUSTRIALE S.r.l. METROLOGICAL LABORATORY

PRISMA INDUSTRIALE S.r.l. is a Notified Body, authorized to carry out the services of **first periodic verification** and **mandatory periodic verifications** on an annual basis, on any **MID-approved instrument**.
